## DETAILED ACTION

### *Allowable Subject Matter*

Claims 22 – 28, 30 – 42, and 44 – 46 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not disclose the use of a individual foot controllers configured to generate non-audio control signals, a mounting frame to secure the foot controllers in a reconfigurable mounting arrangement (i.e., each module is positionable within various mounting locations), a control signal distribution infrastructure, and control signal interfaces. The Examiner notes the importance of non-audio control signals and a control signal distribution interface associated with the mounting frame (all of which is used in conjunction with reconfigurable foot controllers). The Examiner acknowledges that reconfiguring audio control foot controllers is well known (e.g., moving a chorus pedal so as to be used by the left foot, while a wah-wah pedal is moved to be used by a right foot for better balance). Typically, in prior art foot-controlled systems (that send non-audio control signals), a user would "reconfigure" a foot controller by merely changing the device (or effect) that is controlled by a specific foot controller (but the modules

themselves would not be moved or "reconfigured" – a pedal on the right would be "reconfigured" to send control signals to a reverb unit instead of a delay unit). The Applicant's control infrastructure allows (accommodates) reconfiguring the actual physical location of the module, unlike prior art systems.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See Notice of References Cited (PTO form 892).
